What is the Activities Booking System

Our Activities Booking System is an online system for organising sporting events and activities for schools. Our system makes it easy to manage activities and events with minimum effort.

What are the Benefits?

Online – Everyone has access

Easy to organise

Quick and simple to setup

Parental Permission

Increase numbers of participants
for an event

Keep track of all school activities

How it works

Our management roles gives users privileges to easily manage activities within the school. This allows a reduction in management time for arranging events and allows more organised scheduling within the school community.

Administrator

The Administrator has top-level privileges for editing school details and managing coordinators & students, terms, activities and events. The administrator is responsible for creating activities within the system and deciding which coordinator(s) are able to manage them.

Parent

The parent's management role monitors their children's activities and gives approval when required. When a child signs up to an event, the parent has the option to approve or disapprove, (i.e. Parachute Jumping or Horse Riding). This allows for more control from the parent and also gives them information on their child's activities (location, start-end time).

Coordinator

The Coordinator is in charge of creating events within an activity and assigns permission for participation. For example, the school may want to create an event for football training but only a certain number of students need attend. The coordinator(s) can assign particular students to attend this event. Parent approval can be obtained before attending.

Student

The student can view all school activities and events that have been made available to them. They are then able to register for an activity which can then be approved by both Coordinator and Parent before they are then able to attend if required.

Contact Us today for further information about the Activities Booking System provided by Netmedia and ask for a demonstration.
